

**VERTEX  
STAR d.o.o.**  
design and engineering

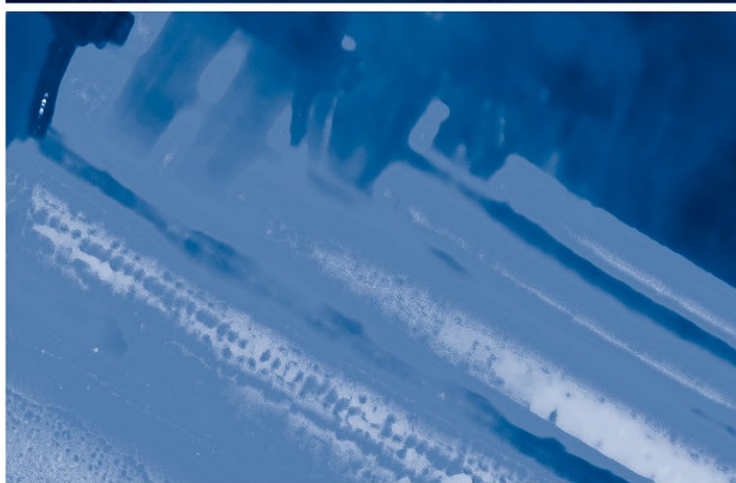

## reliable engineering partner in steel industry

VERTEX STAR doo was founded in 2004 by Nenad Božić as company for design, engineering and consulting. Our core business is in the field of steel making, continuous casting and rolling mills.

We are a team of design engineers, specialists for steel industry machines and equipment.

### Design and engineering services in steel industry:

- EAF/LF
- continuous casting lines, segment casting and ingot casting
- hot and cold rolling mills
- various rail cars for steel mills
- auxiliary equipment and steel structures
- FEM analysis, static and dynamic, fatigue mechanics, structure optimization and heat transfer calculation

### Key customers

- **Primetals**
- **Danieli**
- **Inteco**
- **SMS Concast**
- **Badische Stahl Engineering (BSE)**
- **Kautz Technologies**

### Consulting

- consultation for purchasing equipment for steel mills and rolling mills
- project management
- support and supervising manufacturing/erection
- supplier assessment
- cleaner production, energy efficiency, waste reduction and efficient water utilization

### Mechanical engineering

- engineering problems solving
- research, development and optimization
- plant engineering
- facility layouts
- machine attached piping (3D)
